

A hard solar panel for a motorhome

Overview

It really doesn't get much greener than solar power. Modern photovoltaic solar panels take natural light and turn it into electricity. The more light, the more power you get, but even cloudy days create some curr. Photovoltaic solar panels are covered in a thin layer of silicon. When sunlight strikes the panel, photons are absorbed, which causes electrons to separate from the silicon atoms an. Silicon solar cells are currently available in three main types, which are known as monocrystalline, polycrystalline and thin-film amorphous. Monocrystalline cells are made up of a sin. Freestanding panels can be moved and used for different applications. They often comprise two panels, hinged in the middle, which fold up into a briefcase-style portable unit. A freestandi. Rigid panels are flat, so ideal for roof mounting on a 'van, which optimises exposure to the sun. They are strong and durable, but can be heavy. Heat build-up lessens efficienc.
