

Bahamas microgrid benefits

Overview

Microgrids will provide energy security, particularly on Family Islands, by producing local electricity, reducing fuel reliance, and stabilizing energy costs. The vision shaping the strategy of how best to meet this mission is ambitious: lead the Caribbean Islands in energy innovation and sustainability, setting new standards in grid reliability and. The mission of Bahamas Power and Light (BPL) is to provide reliable, cost-effective, and safe electricity to ensure the continued growth and prosperity of The Bahamas. During hurricanes and other natural disasters, microgrids can ensure that critical services remain powered, enhancing resilience. What Are. Under a new model embraced by the government, a fleet of microgrids financed through power purchase agreements (PPA) is expected to lower those costs, provide resilience and help the islands meet their Paris Accord commitments to cut carbon emissions. We are embracing that future, today.
