

Brazil renewable energy growth

Overview

The Brazil Renewable Energy Market is poised for significant expansion, projected to reach \$24. 27 billion by 2032, exhibiting a Compound Annual Growth Rate (CAGR) of 5. 47% from the 2024 base year. Its electricity system is already dominated by clean power, with more than 84 % of generation capacity coming from renewable sources as of early 2026, driven largely by hydropower, wind, and solar additions. With ambitious capacity additions and growing investor interest, the country's renewable. Brazil has positioned itself as a leader in the global energy transition. Its vast renewable energy resources, strong biofuels sector and ambitious climate commitments offer distinct advantages in the low-carbon economy. Solar capacity surpassed 68 GW by early 2026 while the offshore wind pipeline exceeds 189 GW in environmental. The Brazil Renewable Energy Market Report is Segmented by Technology (Solar Energy, Wind Energy, Hydropower, Bioenergy, Geothermal, and Ocean Energy) and End-User (Utilities, Commercial and Industrial, and Residential).

See how we are driving change, leading the energy transition We are invested in renewable energy, creating new opportunities worldwide. Take a look and see the many ways EDP is driving change for

India achieves record growth in renewable energy capacity in FY

India's renewable energy sector marked a significant milestone in the Financial Year 2024-25, achieving a record-breaking total installed capacity of 220.10 gigawatts (GW), according to

Brazil Renewable Energy Market | 2019 - 2030 | Ken Research

Brazil renewable energy market is valued at USD 17 billion, driven by solar and wind growth, government incentives, and tech advancements, with significant expansion in Northeast regions.

Brazil Renewable Energy Market Size & Share Report 2026-2031

The Northeast anchors Brazil's renewable energy market growth, housing 90% of installed wind capacity and a high-quality solar resource. States such as Bahia, Ceará, and Rio Grande do

Brazil Construction Industry Report 2025 | Output to Grow at an

Key opportunities in Brazil's construction market include growth driven by investments in industrial, residential, and energy sectors, with a focus on renewable energy and infrastructure

Brazil Renewable Energy Market Size, Share Growth Analysis 2034

Brazil renewable energy market reached USD 17.4 billion in 2025 and is expected to grow to USD 31.0 billion by 2034, at a CAGR of 6.60%.

Innergex to be acquired by CDPQ in C\$10bn renewable

This move will transition Innergex into a privately held company, providing enhanced financial stability and long-term strategic backing to

Latin America Renewable Energy Sector Report 2025-2026

According to IRENA, renewable energy dominance in the region continues, with solar and wind expected to account for 90% of new installed capacity. However, infrastructure challenges persist,

Climate Policy Initiative

Climate Policy Initiative helps governments, businesses, and financial institutions drive economic growth while addressing climate change.

Brazil Renewable Energy Market 2026-2034 Analysis: Trends,

This report provides a comprehensive analysis of the Brazil renewable energy market, covering key market trends, challenges, and growth opportunities. It also includes detailed market

Cemig targets energy storage, renewable growth in bold investment plan

Cemig, the state-owned energy company of Minas Gerais, is charting a transformative path with its recently unveiled investment plan for 2025-2029. Among its key priorities is the

Innergex to be acquired by CDPQ in C\$10bn renewable

Innergex Renewable Energy Inc. has entered into a definitive agreement to be acquired by Caisse de dépôt et placement du Québec (CDPQ)

Brazil Renewable Energy Industry, Size, Share, Revenue, Demand ...

Explore Brazil's renewable energy industry, including key growth drivers, government initiatives, market challenges, and competitive dynamics shaping the future of clean energy in the country.

Brazil's Renewable Energy in 2026: Already 85% Green

In 2024, renewable sources supplied 88.2% of electricity generation, while the broader energy mix — including fuels — reached 50% renewability, its highest since 1989, per EPE's 2025

Investing in energy infrastructure to boost the transition

The focus of the energy transition has expanded from climate to include security, re-industrialization and affordability. This shift is underpinned by

Unlocking investment opportunities in Latin America's energy transition

It examines energy investment trends in Latin America and the Caribbean (LAC) since 2015, highlighting investment opportunities for the region as countries look to support economic
