

Foreigners make solar power generation bags

Overview

Young entrepreneur Stefan Ponsold found the answer to this question when he created SunnyBAG, a company developing solar energy systems built into bags that can easily recharge the batteries of mobile devices. The global Solar-powered Bags and Backpacks market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030). A solar backpack is a type of backpack that features. What are the primary demand drivers influencing the adoption of solar-powered bags and backpacks in consumer markets?

□□ Growth Insight: Sustainability-driven demand, backed by better solar tech and urban mobility, accelerates adoption. The market, estimated at \$500 million in 2025, is projected to experience a Compound. SunnyBAG GmbH develops and manufactures shoulder bags and backpacks that have two flexible, water-repellent, scratch-resistant and shock-resistant solar panels integrated into their exterior, which convert sunlight into electrical energy. The energy thus obtained is temporarily stored in a built-in.
