

How to wash off the black spots on the photovoltaic panel surface

Overview

Spray the panels with a hose to remove loose dirt and debris. Turn off the solar. Dust, dirt, pollen, bird droppings, and other debris can reduce energy output by 15–25%, according to the National Renewable Energy Laboratory. The modules are often mounted on roofs at a steep angle of 45°, so take measures to ensure operator safety. When should I clean photovoltaic panels?

You should clean solar systems using the right. The Short Answer: For most homeowners, the best solar panel cleaning solution is simply plain water (preferably distilled or deionized) combined with a soft-bristle brush or microfiber cloth. Discover everything you need to know about maintaining your solar panel: how often to clean it, how to wash it safely, and which tools to use to keep your system performing at its best. The good news?

Proper panel cleaning is simpler than most.
