

Price of new solar panels

Overview

Solar panels typically cost \$12,400 to \$37,200, with a national average of \$24,800 for an 8kW system. However, every home has different production needs based on its size and location, and total system costs are influenced by an array of other factors. Some states, towns, and utility companies offer incentives that can help lower the cost of solar. So, what's standing in the way of American homeowners and solar panels?

The biggest hurdle is often the perceived “upfront cost” of installing solar panels. We work with a panel of solar experts to create unbiased reviews that empower you to make the right choice for your home. Most installers price solar systems by cost per watt. We compared research from government and solar. Updated guide to photovoltaic module prices shows current solar panel costs in Europe. High-efficiency modules have climbed to €0.
