

Smart Energy Storage Cabinet for Power Plants 42U

Overview

Rise of Integrated Energy Storage Systems: 42U cabinets increasingly include built-in lithium-ion batteries, cooling systems, and remote monitoring via SNMP. Increased Focus on Environmental Protection: Waterproof (IP55/IP65) and dustproof designs are now mandatory for outdoor. The Giganet 42U Floor Standing Containment Power Cabinets are equipped with a 3U Power Distribution module to cover all types of power source, two vertical Power Distribution Unit (PDU) and an optional Automatic Transfer Switch (ATS) for connection to secondary power source. What is an all-in-one energy storage cabinet?

AZE's All-in-One Energy Storage Cabinet is perfect for load. A deeper version of our standard 42U SmartRack® cabinet. This enclosure is 1143 millimeters deep (45 inches) compared to the standard 1050 millimeters. This extra depth allows for high-density equipment installations.
