

# Solar Panel Third Quarter Report

## Overview

According to the Solar Market Insight Q4 2025 report from the Solar Energy Industries Association (SEIA) and Wood Mackenzie, the sector added 11.7 gigawatts (GW) of new photovoltaic capacity from July through September, marking one of the strongest quarters in recent history. The US solar industry installed 11.7 GW of new capacity, accounting for 56% of all new electricity-generating capacity added to the US grid in the first half of 2025, with a total of 18 GW. Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and more. The global PV industry is expected to install 592 gigawatts of modules this year, up 33% from the boom year of 2023. Low prices for modules are stimulating demand in new markets, but hurting manufacturers, who are competing intensely to maintain market share. The surge came after a record-breaking quarter. The strength of 2025 deployments is reflective of a regulatory environment that has changed.

### U.S. solar installations jump 49% in third quarter, report says

The U.S. solar industry experienced a significant rebound in the third quarter of 2025, with installations rising 49% sequentially, industry analysts reported Tuesday.

### CLEAN POWER QUARTERLY Ret epk Mr orat

Project developers commissioned 133 utility-scale solar, battery storage, and wind projects in the third quarter of 2025, adding 11,695 MW of clean power capacity to the grid.

### US solar installations jump 49% in third quarter, report says

The U.S. solar industry installed 11.7 gigawatts of new solar capacity in the third quarter, a jump of 49% sequentially, a study by the Solar Energy Industries Association and Wood Mackenzie ...

### Solar and storage represent 91% of clean power additions in Q3 2025

The third quarter of 2025 saw significant additions across the clean power sector. Of the 11.7 GW of total capacity added, utility-scale solar and battery storage accounted for 91% of the total,

### US adds 8.6GW of operating solar capacity in Q3 2024

The US added 8.6GW of new solar capacity in the third quarter of this year and began solar cell manufacturing for the first time since 2019.

### Solar Market Insight Report Q3 2025

Photovoltaic (PV) solar accounted for 56% of all new electricity-generating capacity additions in the first half of 2025, remaining the dominant form of new electricity-generating capacity

## US Solar Installations Jump 49% in Third Quarter,

The report said solar accounted for 58% of all new electricity-generating capacity added to the U.S. grid through the third quarter, with more

## Short-Term Energy Outlook

Release Date: September 12, 2023 STEO Between the Lines: Small-scale solar accounts for about one-third of U.S. solar power capacity More than one-third of U.S. solar power capacity is

## Global Electricity Review 2026

Solar power cemented its role as the dominant driver of change in the global power sector, with its record growth meeting three-quarters of the net rise in electricity demand in 2025.

## Global Cost of Renewables to Continue Falling in 2025

New York/ London, February 6, 2025 – The cost of clean power technologies such as wind, solar and battery technologies are expected to fall further by 2-11% in

## Quarterly Solar Industry Update

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

## REPORT: Q3 Market Report Shows Strong Quarter of Deployment,

Despite robust demand for power, buyers largely sat on the sidelines in the third quarter, waiting for a clearer policy environment to emerge and the rules around tax credit eligibility for

## First Solar (FSLR) Stock Price & Overview

First Solar's quarterly sales rise on higher solar panel demand First Solar, the biggest U.S.-based solar panel maker, on Thursday reported higher

## Expiring US tax credit drives record solar demand in H2

In its fourth-quarter earnings report, the company noted a record 71% storage attachment rate on new installations. However, Sunrun mostly installs

## TX installed 7.4 GW of new solar capacity in first 9

Texas' total solar capacity rose to 48.2 gigawatts after a record-breaking amount of installations in Q3 2025, according to a newly released report.

## 3Q 2024 Global PV Market Outlook

The global PV build forecast is up 1% quarter-on-quarter, largely due to developments in India and Pakistan, with installations slower than previously expected in Japan and South Africa.
